

Graduate Diploma Programme (GDP) – with MSc Top Up

Course overview:

The Graduate Certificate in Construction Management provides a degree-equivalent programme for employed graduates who do not hold a construction-related degree, leading to recognition at the corporate member level with the Chartered Institute of Building (CIOB). The programme has been designed to provide a subject base that maps against the CIOB's framework of competencies. The candidates' graduate backgrounds have been recognised and the mode of delivery, teaching and learning accommodate the students' education levels and current working experiences.

This pathway provides a programme of studies relating to construction and construction management, covering the management of the design, production and aftercare of buildings.
